Summary

I'm a software engineer who enjoys working on complex technical challenges. I've built experience across medical technology systems, mobile robotics, and high-performance applications, which has given me a solid technical foundation.

I have a Bachelor's in Engineering Science and I'm currently pursuing my Master's in Professional Engineering specialising in Software Engineering. I enjoy staying up to date with new technologies and their unique applications.

I focus on writing clean code, collaborating effectively with teams, and delivering results. I'm adaptable and communicate well, which helps me contribute to projects across different domains.

Experience

Rocket Software

7 months

Software Engineer I

August 2026 - Present (1 month)

Perth, WA

Software Engineering Intern - NextGen

February 2026 - August 2026 (7 months)

Perth, WA

- Accelerated Professional Development: Excelled in a fast-paced mainframe Systems Programming ecosystem.
- IBM Z Series Expertise: Mastered IBM Z architecture with advanced 3270 terminal proficiency.
- Low-Level Programming: Developed strong competency in High-Level Assembler (HLASM).
- Workload Orchestration: Built and managed mainframe job schedules utilizing robust JCL.

- Application Design: Created ISPF screens using REXX, DTL, and IBM COBOL.
- Enterprise Systems: Operated CICS/IMS transaction managers, Db2/IMS databases, and Rocket Model 204 (SOUL).

Sir Charles Gairdner Hospital

2 years 1 month

Full-stack Developer

April 2024 - January 2026 (1 year 10 months)

Nedlands, Western Australia, Australia

- I contributed to the successful launch of eMED2.
- Involved in overhauling and refactoring legacy code in the codebase, addressing security concerns that needed attention.
- Made extensive updates to eMED's external loan applet, improving its functionality and reliability.
- My work includes both maintaining existing systems and implementing new features as the platform continues to evolve.
- Implemented and initialised a Vaultwarden password server that is utilised by the Medical Technology and Physics team and authored a step-by-step README with all commands and verification steps to enable reproducible, secure deployments.

Software Engineering Work Experience Student

January 2024 - March 2024 (3 months)

Nedlands, Western Australia, Australia

- I worked with the team on front-end components for the new NMHS eMED system, which is an internal web platform for managing medical equipment and staff.
- Reviewed and tested code from other team members through Git pull requests and handled merging approved branches into the main development branch.
- Contributed to smaller Med Tech projects, including research and development work on an in-house CPR Training Device.

City of Bayswater

4 years 4 months

Shift Supervisor

April 2024 - December 2024 (9 months)

Embleton, Western Australia, Australia

- I oversaw operations and coordinated instructor schedules in scenarios where flexibility and improvisation were required.
- Managed lesson flow, handled customer inquiries, and ensured safety protocols were followed throughout my domain.

Swim Instructor

September 2020 - April 2024 (3 years 8 months)

Embleton, Western Australia, Australia

- I taught water safety and survival skills to students of various ages, along with squad swimming exercises.
- Stepped into session supervisor roles when needed and handled training and management of new instructors.
- Maintained clear communication between parents and students to avoid misunderstandings and ensure everyone was on the same page.
